## PLATFORMS

**SPECIALLY DESIGNED TO MANOEUVRE AND EXHIBIT VEHICLES.**

Our decks are ideal for this function thanks to their strength and sturdiness.

# CAR & VEHICLE PLATFORMS

# GUIL®

## GUIL – Quality Guaranteed, MADE IN SPAIN!

We produce heavy-duty platforms specially designed to manoeuvre and exhibit vehicles (cars, motorbikes, quads, etc). Our decks are ideal for this function thanks to their strength and sturdiness, allowing the possibility to make multiple configurations to adapt to each specific event.

GUIL platforms are perfect for vehicle exhibitions and presentations, with their attractive and elegant design that highlights the displayed car.

They are the ideal display tool of modular design that provides optimal load distribution even for heavy loads (you can use platforms with 4, 6 or 8 legs, depending on the weight of the vehicle, or even add a central reinforcing leg).

# THE BEST COMBINATION: STRENGTH & STABILITY

An essential accessory for these set-ups is our reinforced ramp system so that the car can be transported on and off the stage, using the same platform model and our [ramp kit](#).

GUIL car and vehicle platforms are specially designed to be used in trade fairs, promotional events and exhibitions, as they are adaptable in size and load capacity to the requirements of any car and can be set up to meet the requirements of the customer.

Our stage platforms offer professionals: **maximum safety, guarantee and reliability.**

The platform and ramp are also popular with organisers of motor-races with individual timed starts, such as rallies, providing a raised surface for the start of each car, motor-bike, time-trial bicycle or other vehicle. In this case, two ramps are usually used: one to enter and the second for the exit.
