DJ TABLES & RISERS

OUR PLATFORMS ARE PERFECT FOR A DJ TO SET UP THEIR MIXING EQUIPMENT

The decks can be made to measure to suit all professional needs.

DJ TABLES & RISERS

THE BEST PROFESSIONALS
DESERVE THE BEST EQUIPMENT

Our DJ and Sound Engineer tables will allow any DJ or sound mixer to create a professional workplace anywhere, setting up their turntables, laptops and other equipment and giving free rein to their imagination and creativity.

The reinforced aluminium structure and solid plywood top with 3 cable access holes will allow them to work freely, safe in the knowledge that they are using one of the strongest, most reliable tables in the business.

**GUIL, Quality guaranteed
MADE IN SPAIN!**

**WE MANUFACTURE PRODUCTS
WITH YOUR EASE OF USE IN MIND**

QUALITY PRODUCTS

for your events

To give maximum functionality to our DJ tables, we have designed a wide range of accessories: **stands for audio monitor, for headphones, adaptors for a sun umbrella, microphone stands**, as well as fixture for attaching wooden, acrylic or fabric skirting.

If necessary, the DJ can use our standard stage decks to make a platform, to raise their table above the crowd and appreciate better the sound quality and the reaction of the crowd.

Acoustic insulation

In order to prevent resonance sounds, the contact surfaces between frame and panel are cushioned. The plywood panel is secured to the frame structure by means of strong adhesive foam, stainless steel screws and silicone, which prevent possible noises and vibrations.

Indoor and outdoor use

Thanks to its weather resistant panel, composed of phenolic resin coated layers, and its aluminium legs and framework, **GUIL Dj table is the best option for both indoor and outdoor events**. It also has a fire-resistant treatment for venues with the strictest health and safety requirements.

Versatile – Personalise your DJ Table

Our Dj tables can be personalised in size, colour and height. As manufacturers we can make any size Dj table you require, with the possibility of painting the profile and legs whatever colour you like. Thanks to their plug-in design you can achieve different heights by simply adding different sets of legs (for fixed and also adjustable height). Thus, being able to be used by Dj of different heights. If you require a mobile Dj table, we can add wheels to the legs.

Do you need anything else?

Contact GULL's technical department and we will manufacture the model that best suits the DJ's professional needs.
