PLATFORM **ALL-TERRAIN**

FOR EVENTS WHERE THERE ARE ADVERSE WEATHER CONDITIONS. Our platforms are the perfect solution for stage set-ups in any location and in any climate, even in the water.

PLATFORMS **ALL-TERRAIN** (EVEN IN THE WATER)

At GUIL we love challenges!

Sometimes the need arises to use platforms for events **where there are adverse weather conditions, even with snow.**

Our platforms are the perfect solution for stage set-ups in any location and in any climate, even in the water. Contact us and we will offer you the best stage solution.

All these components guarantee a long product life, even in outdoor assemblies with adverse weather conditions. Finnish plywood is suitable for use at temperatures of up to 100°C, withstanding temperatures as low as -200°C.

Neither water nor snow should be an impediment to setting up your stage; At GUIL we make sure of that.

GUIL decks are made with the best raw materials: reinforced aluminium frame (alloy: EN AW 6063 80-T6) and panels made of 21 mm thick plywood, with 15 layers glued together with phenolic resin. All our platform connectors are made with weatherproof materials (aluminium, stainless steel etc.).

GUIL has almost 40 years of experience in manufacturing platforms with different types of finishes, among which we offer a line of **aluminium platforms with transparent surface (plexiglass)** making them a perfect element to be used for stages in the water, or as flooring to cover swimming pools, so as to make the most of the space.

Our transparent, acrylic-surfaced platforms allow us to create innovative stage designs, lighting up the platforms with LEDs to create a magical atmosphere, perfect for any celebration.

Our decks are designed for situations where short periods of rain or bad weather may appear and threaten your event. Rather than having to dismantle your stage immediately, the show can go on without fear of your deck surface warping or delaminating like other stage platforms. If the bad weather persists the platforms should be dried and stored away.

The deck surface is weather resistant, **NOT WATERPROOFED**, but can withstand moisture on an intermittent basis. It was not designed to be used as a permanent installation where it is exposed to harsh elements all year round.

WE MANUFACTURE A WIDE RANGE OF ACCESSORIES AND COMPLEMENTS to cover all the requirements of your project:

Legs: We manufacture 6 different types of legs (**PTA5-F**: fixed height legs for a specific platform height, **PTA5-N**: fixed height legs with leveller, **PTA5-T**: telescopic legs for an adjustable platform height (or uneven terrain), **PTA5-D**: telescopic leg with adjustable leveller, **PTA5-P**: telescopic legs with locking pin and adjustable leveller, **PTA5-R**: Angle-adjustable telescopic leg for a perfect for set-ups on a slope or for ramps).

Connectors: a wide variety of connectors to join and level GUIL platforms.

Access stair – We manufacture 3 models of Access stairs, all made in reinforced aluminium:

- Folding adjustable aluminium stairs with handrail Ref. ECP
- Aluminium modular access stair with fixed height legs Ref. ECD
- Aluminium step modules with 3 fixed legs and 1 with leveller Ref. ECT. Note: two handrails are included with stairs with 4 steps or more (ref. ECT20-80).

Safety rails for the perimeter of the stage Ref. TMQ (reinforced aluminium). 2m, 1m and 0.5 m lengths.

Ramps: Set of various components to create ramps using GUIL Platforms. Ref. RMP

Seats: Convert your platforms into a grandstand or tiered seating. Ref. A-1/G

Wheels: Convert your decks into a rolling stage.

Transport and storage trolleys/dollies for decks. We manufacture many types of trolleys to satisfy any need.

Strengthening braces: Additional accessory to reinforce platforms for high stages ART

Accessories and Adaptors for Platforms.
