STAGING SYSTEMS FOR **CATWALKS**

WE CAN MANUFACTURE PLATFORMS OF ANY MEASUREMENTS with different shapes such as triangular, trapezoid, circular, that allow you to create original configurations.

STAGING SYSTEMS FOR CATWALKS

Our platforms are ideally suited to the demands of fashion events: we can manufacture platforms of any measurements, with different shapes such as triangular, trapezoid, circular, that allow you to create original configurations with an excellent finish.

Few events require such detailed organisation and personalised staging as a fashion show.

GUIL
Safety for your events

In a stage for catwalks it is important that everything is perfect and that every little detail has been taken care of.

SAFETY, QUALITY & STRENGTH

Ramps, angles, steps, curves, and different colours: any fashion runway design you can imagine, GUIL has the product that is ideal to meet all your expectations. Platforms with methacrylate panels can be used to make runways in water, or lit up from below, creating truly spectacular effects.

Naturally, runways are not just for fashion shows. GUIL's platforms can be used to make a path between two points in almost any environment – perhaps as part of a wedding celebration, a sporting event, or... well, you decide. What will your runway be for?
