ADJUSTABLE 4-STEP LADDER

ECP-4

The ECP-4 staircase, composed of 4 steps, is a practical, multi-purpose item with a hinged design, which allows it to be used on stages from 700 to 1300 mm high.

Its **folding design** and reinforced aluminium structure mean that our ECP-4 staircase is very robust, and at the same time **light and compact**, making it easy to transport and store.

INDOOR AND OUTDOOR USE: Our ECP stairs are made in aluminium, both the reinforced structure and the steps and handrails, which prevents them from rusting.

QUICK & EASY SET-UP: The same staircase can be used for stages from 700mm to 1300mm in height, simply by adjusting the inclination of the steps and regulating them with the fixing system.

STEPS: The ECP-4 adjustable staircases are composed of four reinforced steps of 300x800mm, each one made of aluminium with anti-slip diamond plate surface.

ADJUSTABLE 4-STEP LADDER

ECP-4

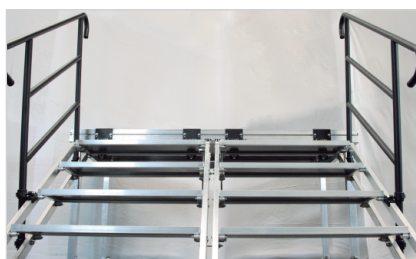

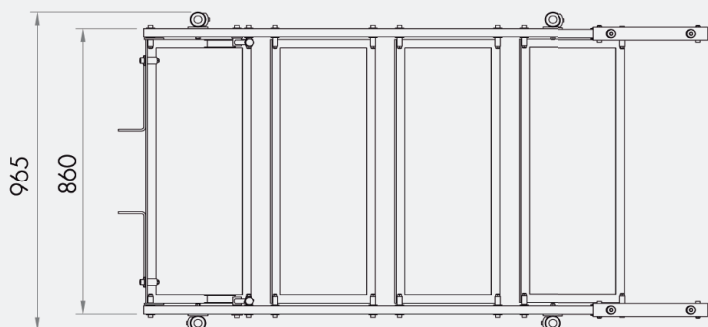

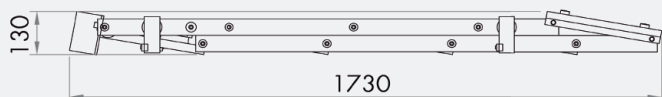

HANDRAIL: The staircase includes a set of handrails (Ref. PSA-05) made of Ø 35 mm tube with internal cross-shaped reinforcement, made of high-strength aluminium and finished in black powder paint.

Its design with two horizontal bars guarantees greater safety for the users. The handrails are supplied with six connectors to attach them to the staircase structure, including an inner plate to avoid marking the rails and to make them last longer.

CONNECTORS: The staircase is attached to the stage deck with two reinforced steel plates fastened with two screws each to the continuous rail slot on the frame, securing it perfectly to the stage.

To provide a solution for all stage heights, the ECP staircase is available in two versions:

- Ref. ECP-4: 4 steps. For stages of 700 – 1300 mm height (Net weight: 36 Kg)
- Ref. ECP-6: 6 steps. For stages of 900 – 1800 mm height (Net weight: 48 Kg)

NOTE: If the event requires wider steps, two staircases can be fitted together.

DECLARACIÓN DE CONFORMIDAD

CERTIFICATE OF CONFORMITY

El Departamento de Investigación y Desarrollo de:
The Research and Development Department of:

GUIL Accesorios Música S.L.

Certifica que los modelos:
Certifies the models:

ECP-4 y **ECP-6** (escaleras regulables de 4 y 6 peldaños) están fabricados en aluminio con superficie antideslizante.

ECP-4 and **ECP-6** (adjustable stairs with 4 or 6 steps) are manufactured in aluminium and with a non-slip (diamond plate) top surface.

Fabricados en:

Manufactured at the following location:

**P.I. La Creu C/ Ismael Tomás Alacreu, 28
46250 - L'Alcúdia -Valencia - SPAIN**

Estos productos cumplen las exigencias de seguridad según las siguientes Normas y Reglamentos:

These products comply with the safety requirements according to the following Standards and Regulations:

- DIN EN 1999-1: EUROCODE 9
- UNE-EN ISO 10042:2006

Las escaleras regulables **ECP** están sometidas a los controles de seguridad y pruebas de resistencia realizadas en la fábrica de producción.

*These **ECP** adjustable stairs are submitted to safety controls and to further strength tests carried out in the production factory.*

El presente certificado es válido salvo suspensión o retirada notificada con tiempo.

The Certificate is valid unless it is cancelled or withdrawn on written notification.

La persona facultada para elaborar el Expediente Técnico es: Salvador Gascó García, realizado en P.I. La Creu C/Ismael Tomás Alacreu, 28 - 46250 - L'Alcúdia, Valencia (SPAIN).
