

## Installation and/or replacement of bus & lorry windows and windscreens

¿How many buses and lorries do you see every day?

¿How do specialised workshops lift and stabilise bus and lorry windows during installation?

At GUIL we have developed lifters specially designed for quick, easy and safe installation of bus and lorry windscreens and other vehicle windows

The set of items to install windscreens consists of: a TORO A lifter (depending on the working height: Ref. TORO A-101/C or TORO A-102/C), a boom arm Ref. ACT-05, the stabiliser accessory Ref. ACT-10 and a set of suction cups (not included):

**1 x TORO A-range lifter.** Ref. **TORO A-101/C** or **TORO A-102/C**: Light, robust lifters thanks to their components, certified to lift **loads of up to 170 kg** to a maximum height of **2,90 m** and **4,10 metros** respectively. Supplied with double-handled winches.

- The legs of the lifter fit under the vehicle, meaning it can be moved close while carrying the windscreen, ensuring safe, convenient installation.
- Compact design for easy handling and storage. Stowed height of only 1.75 m.
- Easy for a single operator to use. Time saved = Increased productivity.
- Large lifting capacity. Offers maximum stability, safety and resistance during installation.
- Quick and easy set-up (no tools needed).

**1 x Boom arm attachment Ref. ACT-05 + Suction cups** (not included)

**1 x Adjustable attachment Ref. ACT-10:** Can be fixed to any points of the mast of the lifter and consists of two independently adjustable arms (in width and depth) to position the window/windscreen during installation, preventing it from swinging. These arms are fitted with two rubber swivel wheels to avoid marking the window or glass.

With the aid of our windscreen installation lifter, we can lift the windscreen and take it up to the vehicle for quick, safe installation. Once the window has been hung from the lifter, we can tilt it and lift it for installation.

GUIL's TORO A-Range lifters make installing bus and lorry windows **QUICKER, EASIER & SAFER**

Thanks to their easy loading on vehicles, their reduced dimensions, the handy positioning of the load to be lifted and their quick set-up, GUIL's lifters for the installation of windscreens are considered some of the most functional on the market.
