LIFTERS FOR
AWNINGS & PERGOLAS

MADE IN SPAIN

YOUR MANUFACTURER OF MATERIAL LIFTERS

MATERIAL LIFTERS FOR AWNINGS & PERGOLAS

GUIL

GUIL is a national company that specialises in the manufacture of manual **MATERIAL LIFTERS** and their accessories, particularly those used in the installation and set-up of **AWNINGS and PERGOLAS**, which allow installation time to be reduced, with the consequent gain in productivity, and worker safety to be increased during set-up.

Since the company was founded, in **1983**, we have been continuously increasing our range to satisfy the needs of the sector, developing very compact models that allow awning or pergola set-ups to be carried out even in reduced spaces.

P.I. La Creu C/ Ismael Tomás Alacreu, 28-30 46250 - L'Alcúdia (Valencia) SPAIN Tel. +34 962996500 - info@guil.es

The ultimate solution to install **AWNINGS, PERGOLAS, SUNROOMS...**

GUIL lifters make the installation of pergolas, awnings and blinds quicker and more flexible, saving time and money.

Very useful in indoor lifting and tight spaces, and when usual lifting systems can't get in.

www.guil.es

P.I. La Creu C/ Ismael Tomás Alacreu, 28-30 46250 - L'Alcúdia (Valencia) SPAIN Tel. +34 962996500 - info@guil.es

SMALL FOOTPRINT FOR INSTALLATIONS ON BALCONIES OR SIMILAR REDUCED SPACES

Awnings can be a complication before you even get to the workplace: taking a 4- or 5-metre awning up the stairs is almost impossible. But with a GUIL lifter, you can lift the awning from the ground straight to the balcony where it will be installed.

Once all your material is ready and awaiting assembly, your GUIL lifter will lift your awning, or pergola or sun-room beam, to the height where you need it, and hold it there while you fasten it in place from the comfort of your step-ladder.

No sweating to lift the part by hand, just wind the winch and let the lifter take the strain. With GUIL, your work is quicker and more productive.

www.guil.es

P.I. La Creu C/ Ismael Tomás Alacreu, 28-30 46250 - L'Alcúdia (Valencia) SPAIN Tel. +34 962996500 - info@guil.es

EFFICIENCY & PRODUCTIVITY

Awnings, pergolas, sun-rooms, etc, are different products, but share a common need during their installation: long, though perhaps not excessively heavy, elements have to be lifted and held in place to be fastened in position.

GUIL have a wide range of lifters to lift items of many shapes and sizes.

You're sure to find the one you need!

MAXIMUM PRODUCTIVITY
SAVE TIME AND COST

SAFETY & QUALITY

It's not just quicker with GUIL lifters: it's safer, too. Our devices minimise risks at work, doing the lifting and holding work in awning and pergola assembly that would otherwise be done by hand while climbing a ladder. By using GUIL, you are protecting everybody involved in the installation.

The reliability and safety of our lifters is ensured by components such as the auto-brake winch, emergency mast brake, and GUIL's own mast unblocking system, which prevent workers near the load suffering any harm even in the unlikely event of the cable breaking.

www.guil.es

P.I. La Creu C/ Ismael Tomás Alacreu, 28-30 46250 - L'Alcúdia (Valencia) SPAIN Tel. +34 962996500 - info@guil.es

LIGHT & COMPACT

A GUIL lifter can be set up in reduced spaces, allowing you to use it in places where other lifters are too large to set up, or cannot even be taken to.

Many balconies or terraces have tight corners where the lifter must stand when assembling an awning or sun-room, and GUIL will allow you to work there more easily.

The lifters are also easy to transport in a van, due to their compact dimensions, and setting up a TORO machine as a counterbalance lifter will allow it to be taken to the edge of a platform to lift the beams and other items for a pergola or sun-room.

WIDE RANGE

Awning and pergola installation can require any of our 30 models of lifter, from the ELC-700, able to lift 85 kg to 3.30 m, to the TORO D range, which can almost all lift over 400 kg to a maximum height of up to 8 m.

Many professionals have at least two models, one (an ELC-720/I, for example) for smaller jobs and another (such as a TORO B-202/C), which allows the load for more substantial projects to be lifted from floor level.

The wide assortment of adaptors offered by GUIL will enable you to look through and decide which of them will most closely correspond to your needs, in both the ELC and the TORO series.

With so much to choose from, you're sure to find just what you're looking for.

GUIL, YOUR MATERIAL LIFTER MANUFACTURER

GUIL OFFERS

Our experience since 1983

Backed up by 40 years in the field of lifting and maintenance. We have always strived to surpass ourselves every day, ensuring that we manufacture the best products with the highest quality.

Pioneers in Design and Technology

We have the most advanced machines available for the development and manufacture of our Material Lifts, and are constantly focused on the needs of the market.

Quality 100% Guaranteed

We use the highest-quality raw materials and components to manufacture our Lifting Towers and their accessories. At GUIL we believe that Safety is the maximum priority.

Certified Products

All our Lifters comply with the market's most demanding regulations and standards, exceeding our customers' expectations and observing the most demanding European directives.

Service and Commitment

Our customers are at the center of all what we do. We are fully at your service, transmitting to you the passion for what we do and how proud we are of our brand.

Cooperation and Flexibility

Our specialised team will always be ready to help you choose the Lifters and accessories that best suit your needs.
