## MATERIAL LIFTS

[www.guil-lifters.com](http://www.guil-lifters.com)

MADE IN SPAIN

# GUIL® Engineering for Lifting Loads

GUIL is a Spanish manufacturer with over 35 years of experience in the metal industry, specialised in the design and production of IMaterial Lifting Towers for industrial use (for maintenance, installation and construction companies), which are characterised as being highly innovative, efficient and safe.

Our head office is found at our premises in L'Alcúdia, a town that is only 30 km from the region's capital, Valencia (Spain) with more than 5000 m<sup>2</sup> for our design and project offices, our prototype and testing workshops, our factory and machinery areas (cutting, welding, painting, assembly etc.), quality control department, warehouse and packing departments, sales and marketing departments and our customer service department.

At the heart of our company is our technical team of engineers who are dedicated to developing lifting towers and wind-up stands of the highest quality and efficiency, and our sales and post-sale staff who offer a fast, competent and professional customer service.

We manufacture over 30 models of lifting towers with compact designs which offer the user a safe and practical option to lift many types of loads. Thanks to this wide range of models and their versatility to be used for so many different tasks along with our adaptors designed for functionality, our towers can be used in numerous fields and are well known for their high quality and durability.

Since 1983 GUIL has experienced a fast and constant evolution and growth, quickly adapting to the ever changing market requirements and continuously improving our manufacturing systems. Thanks to our large distributor network over the 5 continents and our presence at the main national and international trade shows GUIL export just over 89% of their total production to over 90 countries worldwide.

## Choose a model and Lift your load

GUIL manufactures Material lifters that offer:

- Maximum stability, safety and resistance. Maximum Safety & Durability
- Timesaving > 100% Productivity
- Lifts of small size – Easy load in vehicles
- Greater manoeuvrability for an easy, safe and convenient Lift operation.
- Fast and easy set-up with no tools required. There are no loose parts
- Compact and lightweight designs for an easy handling. One person operation
- Domestic and industrial applications. Indoor & outdoor uses
- Maximum versatility. A wide range of accessories & adapters available to fulfil all lifting needs
- Portable designs for an easy transportation and storage in small places. Corridor and single-door access
- Sturdy steel base (Epoxy coated for outside uses) with non-marring castors
- Made in Spain – 100 % Service. Availability of all accessories & spare parts!
- Brake winches that lock the load in place when handle/s is/are released.
- Manual winches provided with one or two removable handles for easy lift storage.
- Lifts are equipped with three Safety Systems to guarantee maximum reliability (triple margin of safety).
- Aluminium and steel sturdy but light construction designed to lift, position and install a large variety of materials.
- Reversible forks for added height and get a better load positioning.
- All range of Lifts comply with the European standards guaranteeing maximum safety and resistance.

### GUIL - Innovative ideas in Lifting Engineering

## Electric Lifting System for TORO Lifters (B - C - D Ranges)

Practical and very safe system that gives the option to raise and lower the TORO material lifts electrically (ranges B, C and D); converting the manual towers into electric towers.

The 'ELECTRIC' system is a very useful accessory which allows you to quickly and effortlessly raise the TORO lifters guaranteeing utmost safety at all times.

The accessory is made up of a 750W METABO drill and an adaptor to secure it to the hand winch on the lifter. The adaptor ensures a firm fix of the drill so that the user is not required to hold the drill in place. This detail not only makes it effortless to use but also prevents possible risk of bodily injuries.

The 'ELECTRIC' system is installed quickly and easily and have the following references depending on the tower it will be used with:

- TORO B-Range lifters – ref. ELECTRIC B
- TORO C-Range lifters – ref. ELECTRIC C
- TORO D-Range lifters – ref. ELECTRIC D

NOTE: When this electric system is used the TORO D-Range towers have a maximum load capacity of 350 kg.

# APPLICATIONS

GUIL manufactures a wide range of innovative material lifts, adapters and accessories designed to cover the needs for a large variety of applications:

## INSTALLATIONS

- \* Air conditioners
- \* Electric heaters
- \* Solar Panels
- \* Dry wall or false ceilings
- \* Electrical fixtures
- \* Roller shutters or awnings
- \* Ventilation systems
- \* Steel girders
- \* Piping
- \* Barrels and metal drums

## CONSTRUCTION - SIGNWORK

- \* Handling construction materials
- \* Handling pallets
- \* Installations of electric signs
- \* Big screens – Billboards

## MAINTENANCE WORK

- \* Hotels
- \* Airports
- \* Stadiums
- \* Maintenance companies

## STANDS & TRADE FAIRS

- \* Decorating stands
- \* Trade fair set-ups
- \* Conventions and conferences
- \* Big screens and displays
- \* LCD/Plasma screen stand

## MANUAL JOBS

- \* Metalwork
- \* Woodwork
- \* Aluminium framework
